📁 Portfolio

Professional Summary

Frontend Engineer about **4 years** of experience building fast and scalable web applications using **React.js** and **Next.js**. Skilled in **API integration, state management, and performance optimization**, and experienced in working closely with designers and backend teams to deliver clean, **user-friendly products**.

Work Experience

Radiansys

March 2022 – January 2026

Senior Frontend Engineer

Technologies: React.js, Next.js, TypeScript, React Query, Redux Toolkit, Material-UI, Tailwind CSS, Supabase

- Designing and developing a modern employee experience platform for **Simpplr**, used by enterprise clients including Zoom, Nutanix, DocuSign, Workday, Coursera, and Fox, supporting **10k+ concurrent users**.
- Architected and led frontend development of **IdeaFloat**, an AI-powered SaaS platform with **5,000+ active users**, integrating AI-driven workflows and OpenAI-powered features.
- Implemented **AI-enabled UI features** such as **intelligent content suggestions**, **real-time chat interfaces**, and **data-driven dashboards** by integrating **OpenAI APIs**, selectively persisting **AI-generated responses** in **Supabase tables**, and maintaining **real-time data synchronization** via **RESTful APIs**.
- Designed and scaled **40+ reusable, modular UI components** following **React best practices** and **atomic design principles**, reducing development time by **30%**.
- Integrated **RESTful + AI APIs (ChatGPT 3.5/4, DataForSEO)** using **React Query**, leveraging **built-in caching** and **request deduplication** to reduce repeated API calls and improve overall application performance.
- Mentored **5+ junior engineers** through **pair programming** and **code reviews**, helping them understand **React Query usage**, **reusable custom hooks**, and **async state handling**, while ensuring proper **API error handling**, **loading states**, and basic **performance best practices**.
- Integrated **Stripe payment gateway** to handle secure transactions, including checkout flows, webhooks, and error handling.
- Designed and implemented a **subscription-based billing model** using Stripe, managing plans, recurring payments, upgrades/downgrades, cancellations, and billing lifecycle events.
- Led daily Scrum meetings and weekly client demos, turning **business requirements into technical tasks** and using feedback to plan sprints.
- Optimized **ALAUTUN**, a freight logistics platform with carrier and shipper portals, integrating real-time chat (Stream Chat), Stripe payment gateway, and **Firestore push notifications** to streamline logistics operations.
- Built **Thrively Care**, a healthcare platform connecting patients with therapists and medical professionals, featuring online booking, video conferencing, and appointment scheduling.
- Contributed to **Good Action** by developing **user-friendly applications** connecting NGOs and volunteers, supporting **secure donations** and **role-based management**.
- Implemented **admin tools**, **payment integrations**, and **content moderation features** to ensure **platform security**, **performance**, and **reliability**.

MEDZ91 — Frontend Developer

September 2021 – February 2022

- Developed **20+ reusable React components** and implemented Redux-based state management for a B2B e-commerce platform.
- Built mobile-first, responsive user interfaces and optimized UI performance, improving page responsiveness by **25%**.
- Debugged and enhanced existing frontend features, improving usability and performance.

Technical Skills

- **Frontend:** React.js, Next.js, JavaScript (ES6+), TypeScript, Redux Toolkit, Context API, React Hooks, React Query
- **UI & Styling:** HTML5, CSS3, Tailwind CSS, Material-UI, Responsive & Mobile-First Design
- **AI & APIs:** RESTful APIs, AI/ML APIs (OpenAI), Supabase, Firebase, Stripe, Stream Chat
- **Testing & DevOps:** Jest, React Testing Library, Git, CI/CD Pipelines

Education

Indian Institute of Petroleum and Energy, Visakhapatnam

Bachelor of Technology — Petroleum Engineering

2017 – 2021

CGPA: 7.75
